

Dagster at the center of your pipelines

Infrastructure Freedom: Why WPipe Wins "Edge" vs. Dagster

The context

Dagster is excellent for data observability, but trying to run it in a resource-constrained (Edge) environment is a nightmare of dependencies and memory consumption.  WPipe was designed from the ground up to be infrastructure-agnostic. Want to run it on a massive cloud server? Perfect. On a Raspberry Pi next to a sensor? Also perfect.

Why engineers shift to wpipe

- Pipelines are Python: versionable, testable, reviewable in Git.
- State persisted to SQLite WAL at every step; resume, don't restart.
- <50MB RAM. No broker, no daemon, no metadata server.

Code-first

Pipelines are Python: versionable, testable, reviewable in Git.

Checkpoints

State persisted to SQLite WAL at every step; resume, don't restart.

Independently lean

<50MB RAM. No broker, no daemon, no metadata server.

What it looks like

```
from wpipe import Pipeline, step

@step(name="step", version="v2.1")
def step(data):
    return {"value": process(data["row"])}

pipe = Pipeline(pipeline_name="dagster_like")
pipe.set_steps([step])

# Step-first resilience without the server.
```

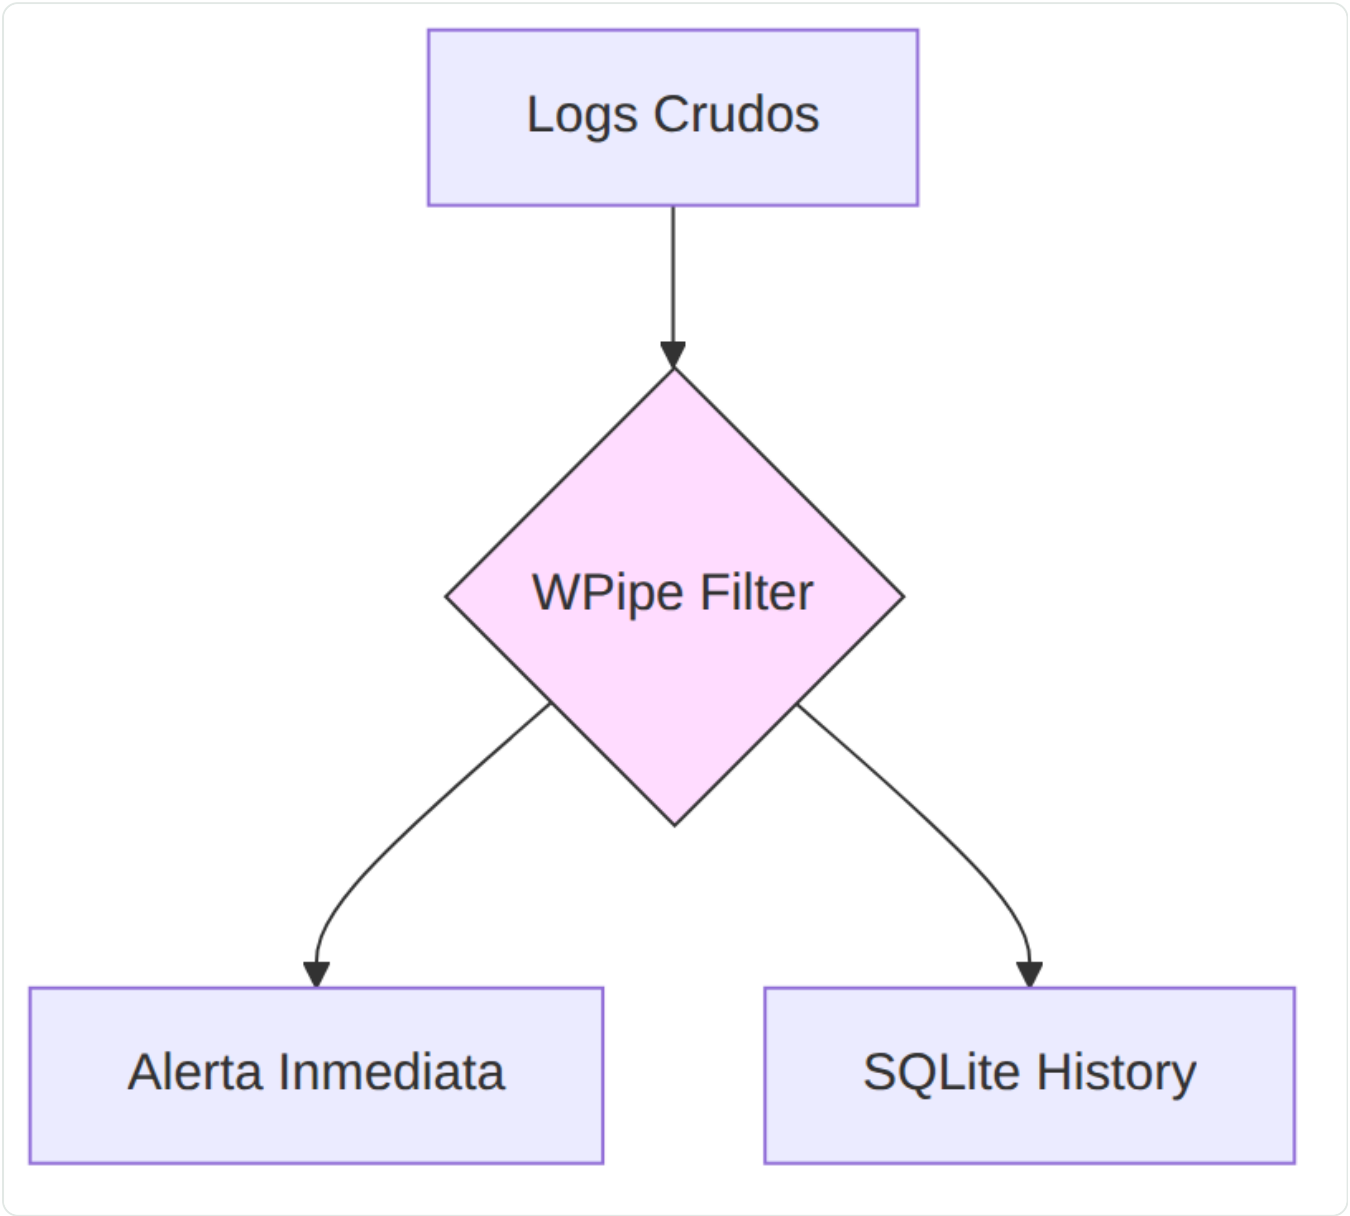

At a glance

Feature	WPipe	Dagster
Memory Footprint	< 50MB	> 500MB
Resilience	Local SQLite WAL	PostgreSQL / Cloud
Learning Curve	Low (Pythonic)	Medium/High

Feature	WPipe	Dagster
Auto-Docs	Built-in Mermaid	Dagster UI (Dagit)

Under the hood

The flow behind the post, as wpipe renders it from code.

+117k downloads
A community of efficiency-first developers.

<50MB RAM
Fits containers, VMs, and Raspberry Pi-class hardware.

SQLite WAL
Industrial durability without a database to administer.

Next step

wpipe is a Python library — try it in your next pipeline:

```
pip install wpipe
```

Steps stay functions you already understand. Docs, diagrams, and dashboards follow. Explore **Dagster** workflows at wpipe.readthedocs.io.

wpipe · Python-native orchestration with SQLite WAL checkpoints, retries, timeouts, parallelism, and self-documenting flows. +117k downloads.
