

N8N PIPELINES, ENGINEERED

N8N: No-code today, code you can ship tomorrow.

When your automation stops being a prototype and starts being Infrastructure. 🦆

+117k

downloads

<50 MB

RAM, total

SQLite

WAL state

Where it hurts today

Three things quietly cost teams time and trust every single week.

READMEs stay
empty

JSON exports
un-diffable

Debugging is a
black box

wpipe turns these into code you control.

What you gain

Code-first

Pipelines are Python —
versionable, testable,
reviewable.

Resume, don't restart

Every step checkpoints
to SQLite WAL.

Featherweight

<50 MB RAM. No broker,
no daemon.

Crash at step 7? Resume from step 4.

Every step persists its state to SQLite WAL — a rerun cost you never pay again.

THE ARCHITECTURE

One pipeline, fully instrumented

State, retries, parallelism and audit — all inside the same run.

wpipe vs. the status quo

Challenge	The No-Code Experience	The wpipe Experience
Architecture	Visual (Canvas)	Code-First (Python/YAML)
Lifecycle	Export/Import JSON	Native Git Flow (CI/CD)
Resilience	Generic retries	Real State Checkpoints
Observability	Logs in proprietary UI	SQL Tracker (Total Transparency)
Ecosystem	Predefined nodes	Any library from PyPI

Based on what the engineering community hits daily.

Answers four questions in one run ↘

Did it run, how far, what failed, and can it resume? Yes, yes, exactly, and automatically.

```
python my_pipeline.py
```

SEE IT IN ACTION

Six lines. That's the learning curve.

```
from wpipe import Pipeline, step

@step(name="ingest", retry_count=3)
def ingest(data):
    return {"rows": data["payload"]}

pipe = Pipeline(pipeline_name="from_n8n")
pipe.set_steps([ingest])
pipe.run(task_ctx)

CHECKPOINTS · RETRIES · TIMEOUT · PARALLEL · TRACKER
```

Code-first

Pipelines are Python — versionable, testable, reviewable.

Resume, don't restart

Every step checkpoints to SQLite WAL.

Featherweight

<50 MB RAM. No broker, no daemon.

Try wpipe in your next pipeline

Install the library, wrap your step, and watch checkpoints and docs appear by themselves.

```
pip install wpipe
```
