

CRON PIPELINES, ENGINEERED

Cron: Upgrade cron from script to system.

Orchestration that scales with you.

WAL state

THE CONTEXT

Where it hurts today

Failures are silent

No history, no audit

One typo kills the job

THE SHIFT

What you gain

Code-first

Pipelines are Python — versionable, testable.

Resume, don't restart

Every step checkpoints to the WAL.

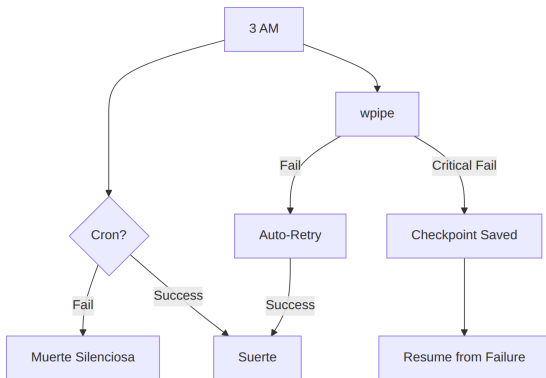

Featherweight

<50 MB. No broker, no daemon.

THE ARCHITECTURE

One pipeline, fully instrumented

State, retries and audit — inside a single run.

SEE IT IN ACTION

Six lines. That's it.

```
from wpipe import Pipeline, step

@step(name="job", retry_count=3,
retry_delay=10)
def job(data):
    return {"done":
run(data["command"])}

pipe =
Pipeline(pipeline_name="cron_pro")
```

CHECKPOINTS · RETRIES · TIMEOUT ·
PARALLEL · TRACKER

Try wpipe in your next pipeline ✓

Install the library, wrap your step
— checkpoints and docs appear
by themselves.

```
pip install wpipe
```

wpipe

Python-native orchestration
