

N8N PIPELINES, ENGINEERED

N8N: No-code today, code you can ship tomorrow.

When your automation stops being
a prototype and starts being
Infrastructure. 🦩

**<50
MB**

RAM, total

SQLite

WAL state

THE CONTEXT

Where it hurts today

READMEs stay empty

JSON exports un-diffable

Debugging is a black box

THE SHIFT

What you gain

Code-first

Pipelines are Python — versionable, testable.

Resume, don't restart

Every step checkpoints to the WAL.

Featherweight

<50 MB. No broker, no daemon.

THE ARCHITECTURE

One pipeline, fully instrumented

State, retries and audit — inside a single run.

SIDE BY SIDE

wpipe vs. the status quo

Challenge	The No-Code Experience	The wpipe Experience
Architecture	Visual (Canvas)	Code-First (Python/YAML)
Lifecycle	Export/Import JSON	Native Git Flow (CI/CD)
Resilience	Generic retries	Real State Checkpoints
Observability	Logs in proprietary UI	SQL Tracker (Total Transparency)

SEE IT IN ACTION

Six lines. That's it.

```
from wpipe import Pipeline, step
```

```
@step(name="ingest",
```

```
retry_count=3)
```

```
def ingest(data):
```

```
    return {"rows":
```

```
data["payload"]}]
```

```
pipe =
```

```
Pipeline(pipeline_name="from_n8n")
```

```
pipe.set_steps([ingest])
```

CHECKPOINTS · RETRIES · TIMEOUT ·
PARALLEL · TRACKER

Try wpipe in your next pipeline ✓

Install the library, wrap your step
— checkpoints and docs appear
by themselves.

```
pip install wpipe
```

wpipe

Python-native orchestration
