

CRON PIPELINES, ENGINEERED

# Cron: Upgrade cron from script to system.

Orchestration that scales with you.

**+117k**

downloads

**<50  
MB**

**SQLite**

WAL state

THE CONTEXT

## Where it hurts today

**Failures are silent**

**No history, no audit**

**One typo kills the job**

THE SHIFT

# What you gain

## Code-first

Pipelines are Python — versionable, testable.

## Resume, don't restart

Every step checkpoints to the WAL.

## Featherweight

<50 MB. No broker, no daemon.

## THE ARCHITECTURE

# One pipeline, fully instrumented

State, retries and audit — inside a single run.

## SIDE BY SIDE

## wpipe vs. the status quo

| Capability  | Cron                 | Cron + wpipe              |
|-------------|----------------------|---------------------------|
| Retries     | ✗ None               | ✓ Scheduled               |
| Checkpoints | ✗ Restarts from zero | ✓ Resumes the step        |
| Logs        | Plain text           | ✓ Searchable SQL Tracker  |
| Alerts      | Nothing              | ✓ Configurable thresholds |

## SEE IT IN ACTION

# Six lines. That's it.

```
from wpipe import Pipeline, step
```

```
@step(name="job", retry_count=3,  
retry_delay=10)
```

```
def job(data):  
    return {"done":  
run(data["command"])}  
}
```

```
pipe =  
Pipeline(pipeline_name="cron_pro")
```

CHECKPOINTS · RETRIES · TIMEOUT ·  
PARALLEL · TRACKER

## Try wpipe in your next pipeline ✓

Install the library, wrap your step  
— checkpoints and docs appear  
by themselves.

```
pip install wpipe
```
