THE CONTEXT

Where it hurts today

READMEs stay empty

JSON exports un-diffable

Debugging is a black box

THE SHIFT

What you gain

Code-first

Pipelines are Python — versionable, testable.

Resume, don't restart

Every step checkpoints to the WAL.

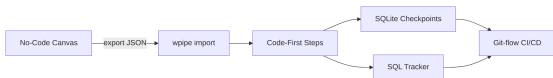

Featherweight

<50 MB. No broker, no daemon.

THE ARCHITECTURE

One pipeline, fully instrumented

State, retries and audit — inside a single run.

SEE IT IN ACTION

Six lines. That's it.
