THE CONTEXT

Where it hurts today

Failures are silent

No history, no audit

One typo kills the job

THE SHIFT

What you gain

Code-first

Pipelines are Python — versionable, testable.

Resume, don't restart

Every step checkpoints to the WAL.

Featherweight

<50 MB. No broker, no daemon.

THE ARCHITECTURE

One pipeline, fully instrumented

State, retries and audit — inside a single run.

SEE IT IN ACTION

Six lines. That's it.

```
from wpipe import Pipeline, step
```

```
@step(name="job", retry_count=3,  
retry_delay=10)
```

```
def job(data):  
    return {"done":  
run(data["command"])}  
}
```

```
pipe =  
Pipeline(pipeline_name="cron_pro")
```

Install the library, wrap your step
— checkpoints and docs appear
by themselves.
